! [rejected] main -> main (fetch first)
error: failed to push some refs to 'https://github.com/anniecv/PunterosLetales.git'
```

se hicieron prueba con los diferentes códigos se de git como:

git init para inicializar x si no esta la extensión de git, git add NOMBRE_DE_LO_CREADO, git add . que nos dice que ya acabo de hacer cambios tuve varios errores con el token pero gracias al material de apoyo se encontró una solución para esos pequeños errores .

```

Hice una carpeta con mi nombre, fue la primera vez que use comandos como git commit, git push, git add. Un compañero me guió gracias a Dios y así pude subir mi carpeta. Me pareció interesante ver como se puede colaborar de forma organizada y simultánea en un mismo proyecto, ya que cada uno puede subir sus avances sin pisar el trabajo del otro.

~/workspace/PunterosLetales$
```

Este fue el código que luego agregue para poder solucionar los problemas que tenía con Github y luego empecé a funcionar con normalidad.

En este momento fue cuando revise si se crearon los archivos desde Replit y se agregó en Github

```

me perdí en la parte de la token pero gracias a la ayuda de mis compañeros encontramos rápido el error pero me di cuenta que de utilidad de los diferentes comandos para para crear y seguir los detalles de git ayudó mucho el apoyo de los compañeros.
